ChromExplorer Offline Chromatogram Viewer and Data Analysis Software

## for the MT Explorer 100 Ion Trap Mass Spectrometer

ChromExplorer software is used by MassTech Explorer 100 ion trap mass spectrometer for offline chromatogram viewing and data analysis. It has an attractive graphic interface and has an expandable modular plug in based architecture.

graphic interface makes it easy to operate .
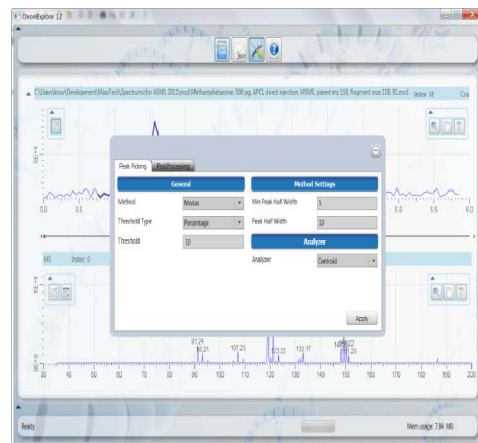

Main features
- Support MT Explorer chromatograms
- Support mzML data format
- Spectrum averaging
- Selected ion chromatogram
- Multiple algorithms for peak detection
- Spectrum processing (extraction, noise filtering, normalization, and smoothing)

Spectrum processing.

Supported operating system:
Windows XP
Windows Vista
Windows 7
